

Ansys Startup Program

Partnering with Today's Startups to Deliver Tomorrow's Reality

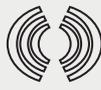

/ Program Overview

Ansys is committed to enabling innovation with the power of simulation in the startup ecosystem. Our program is built with early to mid-stage startups with limited funding and revenue. Qualified companies get access to Multiphysics simulation software and high-performance computing to help you tackle your engineering challenges quickly and cost-effectively.

Ansys' product portfolio of simulation solutions is equipped to help you face your engineering challenges, and our Startup Program bundles those products and makes them affordable when you need them most.

3D DESIGN

/ Eligibility Criteria

With the power of simulation, we see startups determine the feasibility of their ideas, reduce development costs, decrease design timelines, and increase product performance. We work together with qualified startups to find a solution that fits your specific situation and needs. To be eligible, your startup company must:

- Be a privately held company
- Be less than 10 years old as a company
- Have less than USD \$5 million in annual revenue
- Not be an engineering consulting or simulation services company

/ Meet with Success

Ansys is the leading engineering simulation provider, and since program inception more than 1,400 startups in more than 50 countries have joined our program. Startups spanning the autonomous, high-tech, energy, aerospace, automotive, 5G and healthcare industries have chosen Ansys to help them succeed.

“...Leveraging the suite of Ansys tools allows us to ensure a design works with limited test iterations, providing up to \$5 million in cost savings in engine cooling design, \$10 million in increasing engine thrust and up to \$500,000 in mass optimizations.”

- Tom Markusic, CEO of Firefly Aerospace

/ Grow your startup with Ansys

Use Industry-Leading Software

Eligible startups get access to the same software used by industry leaders at deep discounts

Reduce Your Costs

Reduce manufacturing, materials, warranty and prototype costs

Reduce Your Time to Market

Impact your design, testing and prototype timeline

Join the Ecosystem

Ansys is largest simulation company in the world - Gain the opportunity to collaborate on mutually beneficial marketing to gain exposure

Validate Your Technology

Prove real-world functionality and gain further funding

/ Ansys is committed to startups
